Seminar: Sam White - Ohio State University, 11am

Presenter:
Sam White, Ohio State University

Time of Event:
Tuesday, October 25, 2016 - 11:00

Location:
National Socio-Environmental Synthesis Center (SESYNC)
1 Park Place, Suite 300
Annapolis, MD 21401

Title: A Cold Welcome: The Little Ice Age and America’s Colonial Beginnings

Abstract:
The first European explorers and settlers in North America came woefully unprepared for the novel environments and climates they encountered in the New World. Popular understanding equated climates with latitudes and vastly underestimated the stronger continental seasons that Spanish, English, and French would find across the Atlantic. A cooling climate and large volcanic eruptions during the late 1500s only added to their challenges. One expedition after another arrived in America and Canada only to collapse under the stress of droughts, freezing winters, and untimely storms. This presentation, drawn from the author’s forthcoming book, retells early colonial history as a story of confusions, disasters, conflicts, and survival as Europeans met a harsh and uncertain climate. It offers a case study in how the combination of written and physical evidence, historical and paleoclimate records, might help us rethink our history and even offer insights for the present.

About the Speaker:

Sam White is associate professor of environmental history at the Ohio State University. His research specializes in historical climate reconstruction and impacts, combining physical and written evidence. He has published various articles on climate, disease, and animals in human history, co-edited the first major textbook in climate history, and written two monographs: The Climate of Rebellion in the Early Modern Ottoman Empire (Cambridge University Press, 2011) and A Cold Welcome: The Little Ice Age and Europe’s Encounter with North America (Harvard University Press, in review). With Dagomar Degroot, he is the co-founder and director of the Climate History Network.

This seminar is being presented in conjunction with SESYNC Socio-Environmental Immersion Program [1].

SESYNC seminars are open to all interested attendees. Join us in Annapolis!

Can't make the seminar, but still want to watch? Join via our livestream [2]!

The National Socio-Environmental Synthesis Center, funded through an award to the University of Maryland from the National Science Foundation, is a research center dedicated to accelerating
data-driven scientific discovery at the interface of human and ecological systems. Visit us online at www.sesync.org [3] and follow us on Twitter @SESYNC. [4]
