Seminar: Fred Adler - University of Utah, 11am

Presenter:

Fred Adler, University of Utah

Time of Event:

Tuesday, May 9, 2017 - 11:00

Location:

National Socio-Environmental Synthesis Center (SESYNC)

1 Park Place, Suite 300

Annapolis, MD 21401

Title: Urban Ecology: A Challenge and Opportunity for Theoretical Ecology

Abstract: Ecology today is the study of the links between different subdisciplines, often with an underlying concern for linking aspects of anthropogenic change to some indication of the functioning of the ecosystem. I outline the key links that have been the focus of study over the last decade, and show how each of them can be effectively studied in urban environments. Perhaps more importantly, study of urban environments opens up the opportunity to address neglected links, and to assemble a more integrated view of ecological theory that provides a framework for planning and decision-making.

Seminar presented by [Fred Adler](#) [1], Professor of Biology and Mathematics at the University of Utah.

SESYNC seminars are open to all interested attendees. Join us in Annapolis!

The National Socio-Environmental Synthesis Center, funded through an award to the University of Maryland from the National Science Foundation, is a research center dedicated to accelerating data-driven scientific discovery at the interface of human and ecological systems. Visit us online at www.sesync.org [2] and follow us on Twitter [@SESYNC](#). [3]

Event type:

Seminar

Event Attendance:

Open to the Public
