Drs. Lynn Scarlett and Matthew McKinney will convene three workshops focused on issues of governance. The first will explore the concept of network governance, relevant typologies, and existing and needed research on evaluating and integrating socioeconomic, ecological, and political legitimacy outcomes of collaborative, cross-jurisdictional governance models. A second workshop will focus on network governance models as boundary organizations and processes that link scientists, stakeholders, and decision makers. It will also examine how one maps and comprehends patterns of cross-sector, large-scale coordination, and social networks and their relationship to ecological systems. A third workshop will examine the role of social capital in sustaining network governance, and explore how processes and governance design affect the building of social capital.

Participants:

Patrick Bixler, Colorado State University

Jim Boyd, SESYNC

Heather Creech, The Impact Network

Charles Curtin, Denver Zoological Foundation

Kirk Emerson, University of Arizona

Morgan Grove, U.S. Forest Service

Karl Hess, U.S. Fish & Wildlife Service

Mark Imperial, University of North Carolina

Lorien Jasny, SESYNC

Shawn Johnson, University of Montana

Erik Johnston, Arizona State University

Kirsten Leong, National Park Service

Mark Lubell, UC Davis

Laura Ogden, Florida International University

Rosemary O'Leary, University of Kansas

Sonia Ospina, New York University

Richard Paisley, University of British Columbia

Melinda Pruet-Jones, Chicago Wilderness

Michele Romolini, Loyola Marymount University

Chad Smith, Headwaters Corporation

Peter Williams, U.S. Forest Service

Theresa Woods, University of Minnesota
