Introduction to Python Workshop

Time of Event:
Wednesday, April 26, 2017 - 09:00 to 12:30

Location:

SESYNC
1 Park Place, Suite 300
Annapolis, MD 21401

Introduction to Python Workshop

This is a closed workshop for SESYNC affiliates.

Python is the (other) language of data analytics, used at small and large scales to ingest, manage, analyze and visualize data of all kinds. This half-day workshop will occur in two sessions: an introduction to Python for data manipulation, and visualizing geospatial data with Python, ArcPy and open source geospatial packages.

Please contact SESYNC Data Science Instructor Ian Carroll, icarroll@sesync.org [1], with any questions.

Event type:
Short Course/Workshop

Associated SESYNC Researcher(s):
icarroll [2]

Event Attendance:
Private Working Group
