Pursuit: Core Modeling Practices

Time of Event:
Monday, November 6, 2017 - 09:00 to Thursday, November 9, 2017 - 17:00

"Core Modeling Practices"

This is a closed meeting for a funded group of visiting scholars.

This synthesis project aims to identify and articulate core modeling practices into products and methods that are accessible and relevant to different disciplinary and stakeholder perspectives. We will address the following fundamental question: From an interdisciplinary perspective, what are the core practices that should be employed in developing and using models to support integrated water resource management? Effective practices can be wrapped in different forms and formats to serve research (e.g. research publications), teaching (e.g. curricula), management (e.g. training courses and accreditation), and implementation (e.g. documented methodologies) purposes.
