Communications & Broader Engagement Toolkit

This toolkit guides synthesis teams on how to communicate research to a variety of audiences.

We recognize that, along with actionable science, synthesis research exists along a spectrum: from advancing an academic idea to informing decision makers and changing behavior.

- A communication strategy will also exist on a continuum, too, to communicate results and translate findings to a variety of audiences and only you and your team can determine what level of engagement is necessary.
- No matter where your research and communication goals fall upon the spectrums, a communication strategy can be tailored to your specific needs.

Table of Contents:

- Introduction [1]
- What are your Goals [2]
- Who are your Audiences [3]
- How to Reach Your Audiences [4]
- Crafting a Clear Message [5]
- "And, But, Therefore" Statement [6]
- Elements of a Story [7]
