

## **Pursuit: Linkages of agrobiodiversity in urban systems and food-producing landscapes**

### **Time of Event:**

Tuesday, February 12, 2019 - 09:00 to Thursday, February 14, 2019 - 17:00

### **Linkages of agrobiodiversity in urban systems and food-producing landscapes**

The overarching questions addressed by this Pursuit are: How do food-producing systems correspond to characteristic landscapes and connect to food supply chains and in turn how do these factors shape agrobiodiversity? How does the process of urbanization reshape the demand for food systems, and how does this in turn shape food diversity and landscapes? What are the processes and pathways by which food-producing landscapes, production systems and urbanization processes (e.g., food demand) are linked and affect each other?
