

Team Meeting: Understanding the Human Impacts of Ocean Acidification

Time of Event:

Monday, November 4, 2013 - 09:00 to Tuesday, November 5, 2013 - 17:00

The National Socio-Environmental Synthesis Center (SESYNC)

1 Park Place, Suite 300

Annapolis, MD 21401

"Using Spatial Data and Analysis to Understand the Human Impacts of Ocean Acidification" Venture meeting

This is a closed meeting for a funded synthesis group of visiting scholars.

This project will work toward an integrated, spatial assessment of the potential chemical, biological, and human dimensions of ocean acidification (OA) facilitated by three meetings and a parallel data synthesis guided by two overarching goals: 1) assess the potential impact of OA on coastal communities in order to identify hot spots where OA impacts will be most acute, and 2) assess whether current natural and social science research can address policy and environmental management needs for OA; we will identify research needs that are unmet.
