

Team Meeting: Globalization of the Live Plant Trade

Time of Event:

Monday, February 3, 2014 - 09:00 to Friday, February 7, 2014 - 17:00

The National Socio-Environmental Synthesis Center (SESYNC)
1 Park Place, Suite 300
Annapolis, MD 21401

"Globalization of the Live Plant Trade: Informing Efficient Strategies for Reducing Non-Native Pest Invasion Risk" Pursuit meeting

This is a closed meeting for a funded synthesis group of visiting scholars.

Over 2.5 billion plants were imported into the United States in 2009. This global trade in live plants is a major pathway for invasion by non-native insect pests and diseases of agricultural and natural resources. Identifying cost-efficient strategies for reducing the economic and environmental risks associated with invasive pest introduction is a major challenge. Over the course of this synthesis effort, economists, biologists, and policy experts will work together to address this urgent need.
