

Teaching Socio-Environmental Synthesis with Case Studies

Time of Event:

Wednesday, January 14, 2015 - 09:00 to Friday, January 16, 2015 - 17:00

The National Socio-Environmental Synthesis Center (SESYNC) is hosting a three-day short course January 14–16, 2015 to:

1. Introduce participants to S-E synthesis as a problem-solving approach.
2. Engage participants in advancing the teaching of S-E synthesis and related concepts and competencies.
3. Enable participants to use case-based teaching approaches such as the case study method, a powerful and effective teaching approach, to teach S-E synthesis.
4. Support participants in developing their own case study classroom activity that can be used in their classrooms and shared on the SESYNC website.

Attendance for this short course is closed. [Click here for more information.](#) [1]

Event type:

Short Course/Workshop

Associated SESYNC Researcher(s):
