Opportunities at SESYNC

Socio-Environmental Immersion Postdoctoral Fellowship Program:
Successful candidates will use synthesis methods to address a problem arising from, or associated with, the relationship between humans and nature. Details here. Apply by October 24, 2018.

Natural habitat can help farmers control pests
Songbirds and coffee farms in Central America. Ladybugs and soybean fields in the Midwest. These are well-known, win-win stories.

Wildfires are inevitable - increasing home losses, fatalities and costs are not
Shaped by ignitions, climate and fuels, wildfires are likely to become more frequent and severe with climate change.

Water & Governance
"Water is essential for life," states Barb Cosens in the new short documentary, Water & Governance. Water resources across the United States have become points of
Voices of SESYNC

To help navigate the effects of climate change on watersheds, an interdisciplinary team of researchers led by Barbara Cosens, University of Idaho, and Lance Gunderson, Emory University, assessed six water basins across the United States.

SESYNC asked Cosens about the importance of and driving questions behind this research.
