News from the National Socio-Environmental Synthesis Center

Graduate Student Workshop

SESYNC invites applications for the 7th Graduate Student Workshop on Socio-Environmental (S-E) Synthesis, to be held August 6-9, 2019, in Annapolis, Maryland, USA. Workshop goals are to:

- Energize and engage students in innovative, team-based, and use-inspired S-E synthesis research
- Increase student capacities through S-E synthesis training, skill-building, and networking
- Prepare students for upcoming S-E synthesis research and leadership opportunities at SESYNC

Apply by May 31.

Climate Change May Weaken Children's Education in the Tropics

In parts of the tropics, exposure to extreme temperature or rainfall in early life is associated with fewer years of schooling in later childhood.

Environmental change as a public health risk

If the wild protein sources go away, foods that are nutritionally inferior will likely replace them and add to a cascade of health challenges that already exist, explained ecologist and epidemiologist Dr. Chris Golden.

From Tropical Biodiversity to Navigating the New Arctic

From declining Arctic sea ice to tropical deforestation, understanding complex environmental problems requires collaborative, integrative approaches.
