

SESYNC Feedbacks

News from the National Socio-Environmental Synthesis Center

Request for Proposals

Propose a Pursuit:

Teams applying as a Pursuit are invited to apply under the following three Themes:

- Understanding the Ecology Behind the Societal Benefits of Ecosystems
- Social and Environmental Dimensions of the Food-Energy-Water Nexus
- Sudden or Unexpected Events: Environmental Recovery, Reorganization or Restoration

[Details here](#). Apply by **October 22, 2018**.

Propose a Workshop:

Workshops may summarize and/or synthesize the state of the topic and/or identify future directions that have the potential to lead to a larger synthesis effort. Workshop applications are not required to fall under a Theme.

[Details here](#). Apply by **October 22, 2018**.

Graduate Pursuits:

SESYNC is particularly interested in Graduate Pursuit proposals that bring together diverse backgrounds and disciplines as well as diverse sources of data in novel, integrative ways.

[Details here](#). Apply by **November 2, 2018**.

Socio-Environmental Immersion Postdoctoral Fellowship Program:

Successful candidates will use synthesis methods to address a problem arising from, or associated with, the relationship between humans and nature.

[Details here](#). Apply by **October 24, 2018**.

Job Opportunity

Research and Evaluation Assistant:

SESYNC seeks a Research and Evaluation Assistant to join its research programs team in supporting SESYNC's research, evaluation, and monitoring efforts.

[Details here](#). Apply by **September 28, 2018**.

Data & Methods

SESYNC Welcomes Seven New Postdoctoral Fellows

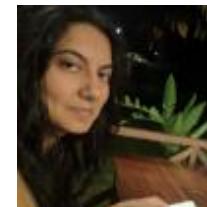

Xavier Benito

Ph.D.: Ecology

Hometown: Tortosa (Catalunya, Spain)

SESYNC Project: Critical transitions in Andean Socio-Environmental systems

Varsha Vijay

Ph.D.: Environmental Sciences

Hometown: Cedar Rapids, Iowa

SESYNC Project: The Effectiveness of Protected Areas in Meeting Ecological and Socio-economic Goals of Conservation

Se Jong Cho

Ph.D.: Environmental Management and Engineering

Hometown: Seoul, Korea

SESYNC Project: Evaluation and projection of global landcover change and impacts on water resources

Quentin Read

Ph.D.: Ecology and Evolutionary Biology

Hometown: Durham, North Carolina

SESYNC Project: Ecological impacts of food waste

Lauren White

Ph.D.: Ecology, Evolution & Behavior

Hometown: Leesburg, Virginia

SESYNC Project: Integrating host movement, genomic, and spatial data to understand the effects of human-altered landscapes on pathogen spread

Kelly Jones

Ph.D.: Nursing

Hometown: Colorado Springs, CO

SESYNC Project: Climate and Health: What is the role of the neighborhood environment in children's respiratory health outcomes?

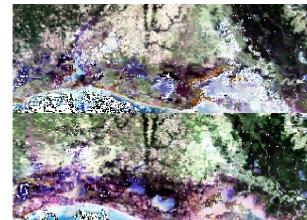

Evan Fricke

Ph.D.: Ecology

Hometown: Montana

SESYNC Project: The role of animals in mediating plant global change responses

Updates from Cyberhelp

New Look for the Files Portal

SESYNC is upgrading the web gateway to the data directory allocated to funded projects! The upgrade will improve support for [syncing files](#) between your computer and SESYNC's file storage.

From SESYNC to Jupyter

The latest addition to SESYNC's cyberinfrastructure - rolling out on September 20th - is a JupyterHub gateway for Python based data analysis and visualization.
